

Mission Specialist Thruster Propeller

Mission Specialist **Thruster Propellers** are molded using high-strength polymer and formed to precise specifications for maximum performance, efficiency, and durability.

Mission Specialist propellers are used on counter-rotating thruster arrangements to eliminate torque roll and yaw and are easily replaced in the field using standard tools.

Specifications

- 95mm diameter, 5mm collet
- Three bladed, left and right pitch-specific
- Glass Fiber Engineered Polymer
- Material specification: DuPont Delrin 577 BK000

VideoRay Part Number

Left Propeller – 70950

Right Propeller – 70951
